

Oulton Broad / Suffolk / UK, 42' Sealine | Luke Smith, Dezember 2011:

*„I am seriously impressed with the DualDock. We have had very strong gales with gusts up to 105 km/h and my yacht lay stable and secure at her unprotected berth. She used to swing around a lot in the past, but that's history. Great !“*

Fiorenzo Lupieri, Manager Marina Portoroz/Slovenia ,at the time, January 2012:

*„We have been testing the DualDock in our marina for almost 6 months now. The System has convinced us, especially during storms. Our own yacht, a Princess 44, lies stable and secure at her berth.“ A stress test using both 550 hp engines in December was very impressive.“*

# Innovative Mooring Solutions & Berthing Stabilisers

## Damped, Secure & Eco-Friendly
